Skills

- React.js
- python
- Web development
- SQL
- Bootstrap

Personal skills

- Able to work harmoniously with the other members of the team.
- possesses great analytical and problem solving skills.
- Active listening

Hobbies

- Travel
- Reading

Internship

Acme infotech

completed internship and training as web development.

- Developed a WhatsApp clone UI website using React.js, a modern and widely used JavaScript library, to create a highly responsive and dynamic user interface that closely mimics the WhatsApp mobile application.

- Implemented the project as a single-page application (SPA) to enhance user experience and minimize page load times, providing seamless navigation and real-time chat functionality for users

Icanio technologies

"smart track training 2022" programing for python (flask)

- Successfully built the backend infrastructure for a cricket-related web application, similar to Cricbuzz, using Python and Flask, a micro web framework. This included designing and developing the application's core functionalities.

- Integrated and processed cricket-related data from various sources, such as APIs, databases, or web scraping, to provide real-time scores, match statistics, and player information to users. Developed custom APIs to efficiently serve this data to the frontend.

Projects

Movie booking app— *BUILT using React.js*

- The development of a movie booking application's frontend using React, a popular JavaScript library.

- Designed and developed a dynamic content management system, allowing administrators to add, update, and manage movie listings, showtimes, and events.

Portfolio — *BUILT using React.js*

- Developed a professional portfolio website using React.js to showcase a diverse range of projects, technical skills, and achievements.

- A well-curated portfolio strategically selects and presents key projects, skills, and experiences, offering a focused and impactful representation of your expertise, ultimately making a strong and memorable impression on viewers.
